

ANKIT GOVIL

AI & Platform Product Leader | Conversational AI · Developer Ecosystems · 0-to-1 Product Launch

Seattle, WA | 425-545-5726 | ankit.18.govil@gmail.com | linkedin.com/in/govilankit | ankitgovil.com

EXECUTIVE SUMMARY

AI Product & Platform Leader with 15+ years taking conversational AI, agent platforms, and developer ecosystems from 0 to scale — at Zoom, Microsoft, and high-growth startups. Leads a 40-engineer organization building Zoom's Agent Platform, growing 20% week-over-week since launch, following six years building Microsoft Teams' AI and mobile platforms (20+ engineers), including creating the Teams AI SDK that unlocked thousands of partner integrations. Combines executive-level product strategy with hands-on building to turn complex AI into high-value products that win customers and empower developers.

CORE COMPETENCIES

- AI Product Strategy & Vision
- API & Developer Experience (DevX)
- Conversational AI & Copilot/Agent Platforms
- 0-to-1 Product Launch & GTM
- Engineering Org Leadership (40+ Eng)
- Partner & Developer Enablement
- Mobile Platform Strategy (iOS/Android)
- Agentic Platform Architecture
- SDK & Platform Design
- Azure OpenAI, RAG & Agent Orchestration
- Business Growth & Ownership
- Executive Stakeholder Management
- SaaS & Marketplace Growth
- Data-Driven Roadmapping

Tools & Build Stack: Python · LLM APIs & SDKs · RAG · Claude Code / Codex (hands-on prototyping) · Figma via MCP · REST/GraphQL APIs · Analytics & Experimentation

PROFESSIONAL EXPERIENCE

Zoom

Seattle, WA

Product Lead, Agent Platform

July 2025 – Present

- Lead a 40-engineer organization delivering app and agent extensibility for Zoom Workplace — the platform that lets developers create and publish apps and agents on Zoom.
- Own the built-in Zoom Workplace agent, designed to help users get more done directly inside their workday, and personally built and shipped an autonomous PM Report & Analytics agent adopted by 10 PMs, saving each 10+ hours of manual reporting.
- Launched the Agent Platform two months ago; user adoption has grown 20% week-over-week since release.

Microsoft

Seattle, WA

Senior Product Manager, Teams Platform

May 2022 – July 2025

- Own product vision and roadmap for Teams AI conversational extensibility — AI bots, Custom Copilots, and next-generation agentic UX.
- Created and lead the Microsoft Teams AI Library (v1 & v2) with a 20+ engineer team — a core Copilot building block for JavaScript, C#, and Python, taken from concept to General Availability in under 12 months and cutting developer time-to-first-message from days to under 30 minutes.
- Defined and executed the go-to-market plan, driving 10,000+ net-new developers, onboarding 150+ partners, and unlocking millions of new monthly active users through multi-channel campaigns and ecosystem engagement.
- Partnered with Azure OpenAI and Microsoft Graph engineering to integrate RAG, long-term memory, compliance, and agent orchestration into Teams with native Copilot support.
- Personally led hands-on AI-building lab sessions using the Teams AI Library, training 40+ PMs to prototype LLM-powered agents for their own customer scenarios — work showcased in the Microsoft CEO keynote and at Build and Ignite.

Senior Product Manager, Mobile Platform

April 2019 – August 2022

- Owned end-to-end app acquisition strategy and go-to-market for Microsoft Teams Mobile — launched third-party, first-party, and custom app support plus a native app-store experience across iOS and Android, driving 5M+ additional monthly active users and a new platform revenue stream.

- Designed in-app search and installation workflows optimized for mobile-first frontline workers and education users, improving accessibility and adoption.

Product Manager II, Microsoft 365 Admin Experience

June 2018 - March 2019

- Built a centralized M365 Admin Center portal from concept to launch, orchestrating 10+ partner teams to unify management of 1P, 3P, and LOB apps across Office add-ins, Teams, and SPFx with Azure authentication.
- Shipped the V1 release in two quarters despite complex dependencies, reaching 20,000 global admin MAU and 60,000 monthly app installations with outstanding CSAT scores.

Belong.co

Bengaluru, India

Product Manager (0-to-1)

May 2015 - May 2018

- Built and launched an HRMS/Applicant Tracking SaaS platform with algorithmic matchmaking for passive candidates, securing \$0.6M ARR from enterprise clients including Ola, Amazon, and Uber.

Ezetap

Bengaluru, India

Product Manager

September 2014 - May 2015

- Led SMB discovery and rolled out new revenue lines (mobile recharges, ticket bookings) in Tier 2/3 cities, driving a 2x ARPU increase within one release cycle.

EARLIER CAREER

Co-Founder & Product Developer, early-stage startups (2011-2014) — architected scalable backend infrastructure, distributed systems, and microservices underpinning business-critical applications.

Product Engineer, Oracle (2010-2011) — delivered the Oracle Fusion App launch: 30% latency improvement, piloted at five top-tier global universities.

EDUCATION

Birla Institute of Technology and Science (BITS Pilani)

June 2010

B.E. (Honors), Computer Science & M.S., Economics — Integrated Dual Degree, GPA 3.7 — Pilani, India
